

AJITHKUMAR S

Cloud Ops Engineer – (3.5 Years)

☎ (+91) 6369161959 | ✉ rlaajith003@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Cloud Infrastructure Engineer with over 3 years of hands-on experience in managing, operating, and supporting cloud platforms, with strong expertise in Red Hat OpenShift, Kubernetes, and VMware. Adept at maintaining high-availability infrastructure, streamlining fault management processes, and ensuring optimal system performance for telecom-grade environments.

Proven capability as a Single Point of Contact (SPOC) for cloud operations, delivering prompt L2 support, resolving incidents, and collaborating with cross-functional teams to achieve business objectives.

Seeking a challenging opportunity to apply cloud-native and OpenShift skills in a dynamic enterprise cloud infrastructure role.

Technologies: Kubernetes | RedHat OpenShift Container Platform | Linux | NFVI | VMware Integrated OpenStack

EDUCATIONAL QUALIFICATION

Bachelor of Engineering in Mechanical Engineering (2017–2021)

CGPA: 7.5

PROFESSIONAL EXPERIENCE

- **Cloud Infra Ops Engineer - May 2022 to Present**
Client: Nokia Solutions & Networks
Payroll: Movate Technologies (Formerly CSS Corp)
Project: TPG Telecom, Australia (Remote)
Location: Chennai, India
 - **Cloud Infra Ops Engineer - Feb 2022 to May 2022**
Client: Nokia Solutions & Networks
Payroll: Niscom Tele Infra Pvt Ltd.
Project: TPG Telecom, Australia (Remote)
Location: Chennai, India
-

ROLES & RESPONSIBILITIES

- Served as the Single Point of Contact (SPOC) for managing cloud pre-production and production environments, ensuring high availability and stability across OpenShift, Kubernetes, and VMware-based infrastructures.
- Specialized in Red Hat OpenShift (OCP) architecture—performed installation, deployment, and lifecycle management of containerized telecom workloads, focusing on performance tuning, scalability, and automation via CI/CD pipelines.
- Deployed cloud-native applications and network functions using Helm charts and OpenShift Templates, leveraging Secrets, ConfigMaps, and environment-specific parameters for secure and flexible rollouts.
- Administered Role-Based Access Control (RBAC), resource quotas, projects, and Security Context Constraints (SCCs), integrating with telecom-grade Identity Providers to enforce secure access and compliance policies.

- Provisioned and orchestrated persistent storage using PVs, PVCs, and dynamic Storage Classes; configured networking elements including Services, Routes, Ingress Controllers, and Network Policies.
 - Enabled observability and operational insight using Prometheus, Grafana, and Alertmanager—ensured SLA adherence and proactive monitoring of CNFs/VNFs.
 - Experienced in multi-cluster operations leveraging Red Hat Advanced Cluster Management (ACM), Advanced Cluster Security (ACS), and container image management with Quay.
 - Provided 24x7 L2 operational support—led fault analysis, service restoration, root cause investigations, and ensured SLA-driven incident resolution.
 - Actively participated in bridge calls during high-severity incidents; collaborated with L3 support and vendors for in-depth troubleshooting and log analysis.
 - Conducted infrastructure health checks, cross-domain issue resolution, and maintained baseline configurations for ongoing platform stability.
 - Participated in software upgrades, test plan reviews, and operational acceptance testing of newly integrated components.
 - Performed hardware diagnostics and recovery on HPE and Ericsson CRU platforms using BMC/iLO console access.
 - Collaborated with project teams to review High-Level Designs (HLD), Low-Level Designs (LLD), and Test Objective Lists (TOL), supporting seamless network integration and deployments.
 - Managed change requests (CRs) and incidents in alignment with defined SLAs; drove automation of repetitive tasks through custom scripting and GitOps workflows.
 - Authored Method of Procedure (MOP), Work Instructions, and Root Cause Analysis (RCA) reports; maintained coordination with customer care and engineering teams to ensure continuous service delivery.
-

CERTIFICATIONS

- OpenStack and Network Functions Virtualization (Telco Cloud)
 - Knowledge of Kubernetes in Network Functions Virtualization
-

PERSONAL SKILLS

- Quick learner with a strong ability to grasp new concepts efficiently.
 - Consistent performer with a focus on continuous improvement.
 - Eager to explore new areas of learning and expand expertise.
 - Adaptable and flexible in dynamic work environments.
-

PERSONAL DETAILS

- Date of Birth: 11/10/1999
 - Gender: Male
 - Marital Status: Unmarried
 - Languages Known: English, Tamil
-
